

STAGES

STAGE DESIGN

- UEG maintains a variety of stage creative components in order to produce a wide range of stage designs.
- We have planned and built a wide range of stage sets and stage designs to fit our clients needs.
- Designer LED stairs may be added to any stage and come in variety of designs and heights.
- Our stages can be built over pools to increase the size of your event.
- UEG has designed and built stages ranging from: off buildings, to over stadium seats, to beer garden decks.

STAGES

WHAT TO MAKE IT COME TO LIFE

- The UEG lighting packages include a host of programmable intel lighting to create lighting effects for shows, gala dinners, parties, and custom light effects.
- Custom-printed stage sets – these 1m x 2.4m panels fit together perfectly to form a stage design that ranges from 1m to 20m in length.
- 3D stage props and features – You can choose from our range of stock props and features.
- Create a higher walkway for dancing acts, fashion shows, vehicle shows, even matric dances.
- A custom stage set can be built to accommodate LED screens, discussion panels, or client-provided theme ideas.

STAGES

SAFETY

- Construction and design: Our stage sets are made in Europe using the highest quality materials and are safety tested to European standards.
- Our stages are weatherproof and composed of aluminum and marine plywood with non-slip plastic tops. They can be built over water.
- For the edge in low-light spaces, add our LED strips, stage rails, wheelchair ramps, and stair rails that we offer.
