TREATS AND EATS

REQUIREMENTS

- All treats and eats machines require a separate 15A plug point PER MACHINE no further than 10m from the stand/stall/installation
- Ice cream machines consume 15A of power each, and therefore required dedicated power no further than 10m from the stand/stall/installation
- Installations of more than 6 x treats and eats machines will require 3 phase power
- An optional 3 phase generator can be supplied at an additional cost
- Access for trollies is required for installation of all Ice Cream machines no further than 2m from final placement/setup
- A cold-water tap will be required for all treats and eats installations, no further than 20m from setup
- Quotations are based on 4-hour events minimum, should serving be in a shorter time frame, additional equipment and staff will be required at an additional charge
- Quotations are based on 6-hours maximum per event
